

Ansen Corporation is a rapidly growing North American Company in the electronics contract manufacturing services industry. We currently have two Engineering positions open in our Ogdensburg, New York facility. We offer a competitive salary and a comprehensive benefit package which features Health, Dental 401K, Long Term Disability and Paid Vacation.

Process Engineer

The Process Engineer develops, implements reviews and improves production processes to support all customer and internal specifications, as well as providing technical and communication support to all plant production staff. Knowledge of statistical process control and ability to work with PC based software applications are required, as is a BS in Electrical, Mechanical or Industrial Engineering. We will consider other equivalent combinations of engineering experience and education.

Test Engineer

The Test Engineer designs and develops test equipment, programs and fixtures to meet performance specifications for all Ansen products. This position requires a BS in Electrical/Electronic Engineering or related degree and a minimum of 1-3 years experience as well as proficiency with PC based software including CAD, Visual Basic, spreadsheets and word processing. We will consider other equivalent combinations of experience and education.

Candidates interested in one or both positions above should send resume, letter of interest and salary requirements to ansenhr@ansencorp.com, or mail to Human Resources, 100 Chimney Point Drive, Ogdensburg, New York 13669 or fax to Human Resources at 315-393-7638. Our consideration of applicants will begin immediately and continue until the positions are filled.
